EXAMINER'S ACTION

AUI/for

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 2-18, 21-35 and 37 are rejected under 35 U.S.C. § 112, first paragraph, as the disclosure is enabling only for claims limited in accordance with the specification which discloses a method of mammals which decreases the incidence of diabetes mellitus. See M.P.E.P. §§ 706.03(n) and 706.03(z).

The rejection is repeated essentially for the reasons set forth in the previous office action, except that claims 17 and 21-35 are included in the present rejection due to applicants' amendment. Applicants have argued that the occurrence of any chronic immune mediated disorder would be expected to respond to the claimed immunization schedule the same as diabetes mellitus. However, this argument is not found to be convincing. In support of their argument, applicants cite several other patents. However, it is noted that each application is examined separately on its own merits. Applicants also cite a study of the occurrence of SLE in mice, which is summarized in the Declaration of Dr. Classen. However, it is not clear if the results stated by Dr. Classen are statistically significant; furthermore, this one study does not provide support commensurate with the scope of the claims, which recite any "chronic immune mediated disorder", or as in claim 15 "an autoimmune disease, asthma/allergy, and an immune mediated cancer". It is maintained that it has not been shown that undue experimentation would not be required to devise experimental procedures, including day of administration, type and amount of

immunogen, which would prevent the occurrence of the huge range of diseases, including cancer, encompassed by the claims. The application should not be an invitation to experimentation. The rejection is maintained.

Claims 2-18 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 2-18 are dependent on cancelled claim 1.

Claim 9 remains vague and indefinite in its recitation of "the method of claim wherein said...".

Claim 32 remains vague and indefinite in its recitation of "at least one pharmaceutically acceptable immunogen at least 11 days, but less than 26 days, after the last dose of said immunogen proceeding 26 days of age of said mammal". It remains unclear what is intended by this phrase.

Applicant's amendment necessitated the new grounds of rejection. Accordingly, **THIS ACTION IS MADE FINAL.** See M.P.E.P. § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a).

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.
